

cosmopolitan™ *Collection*

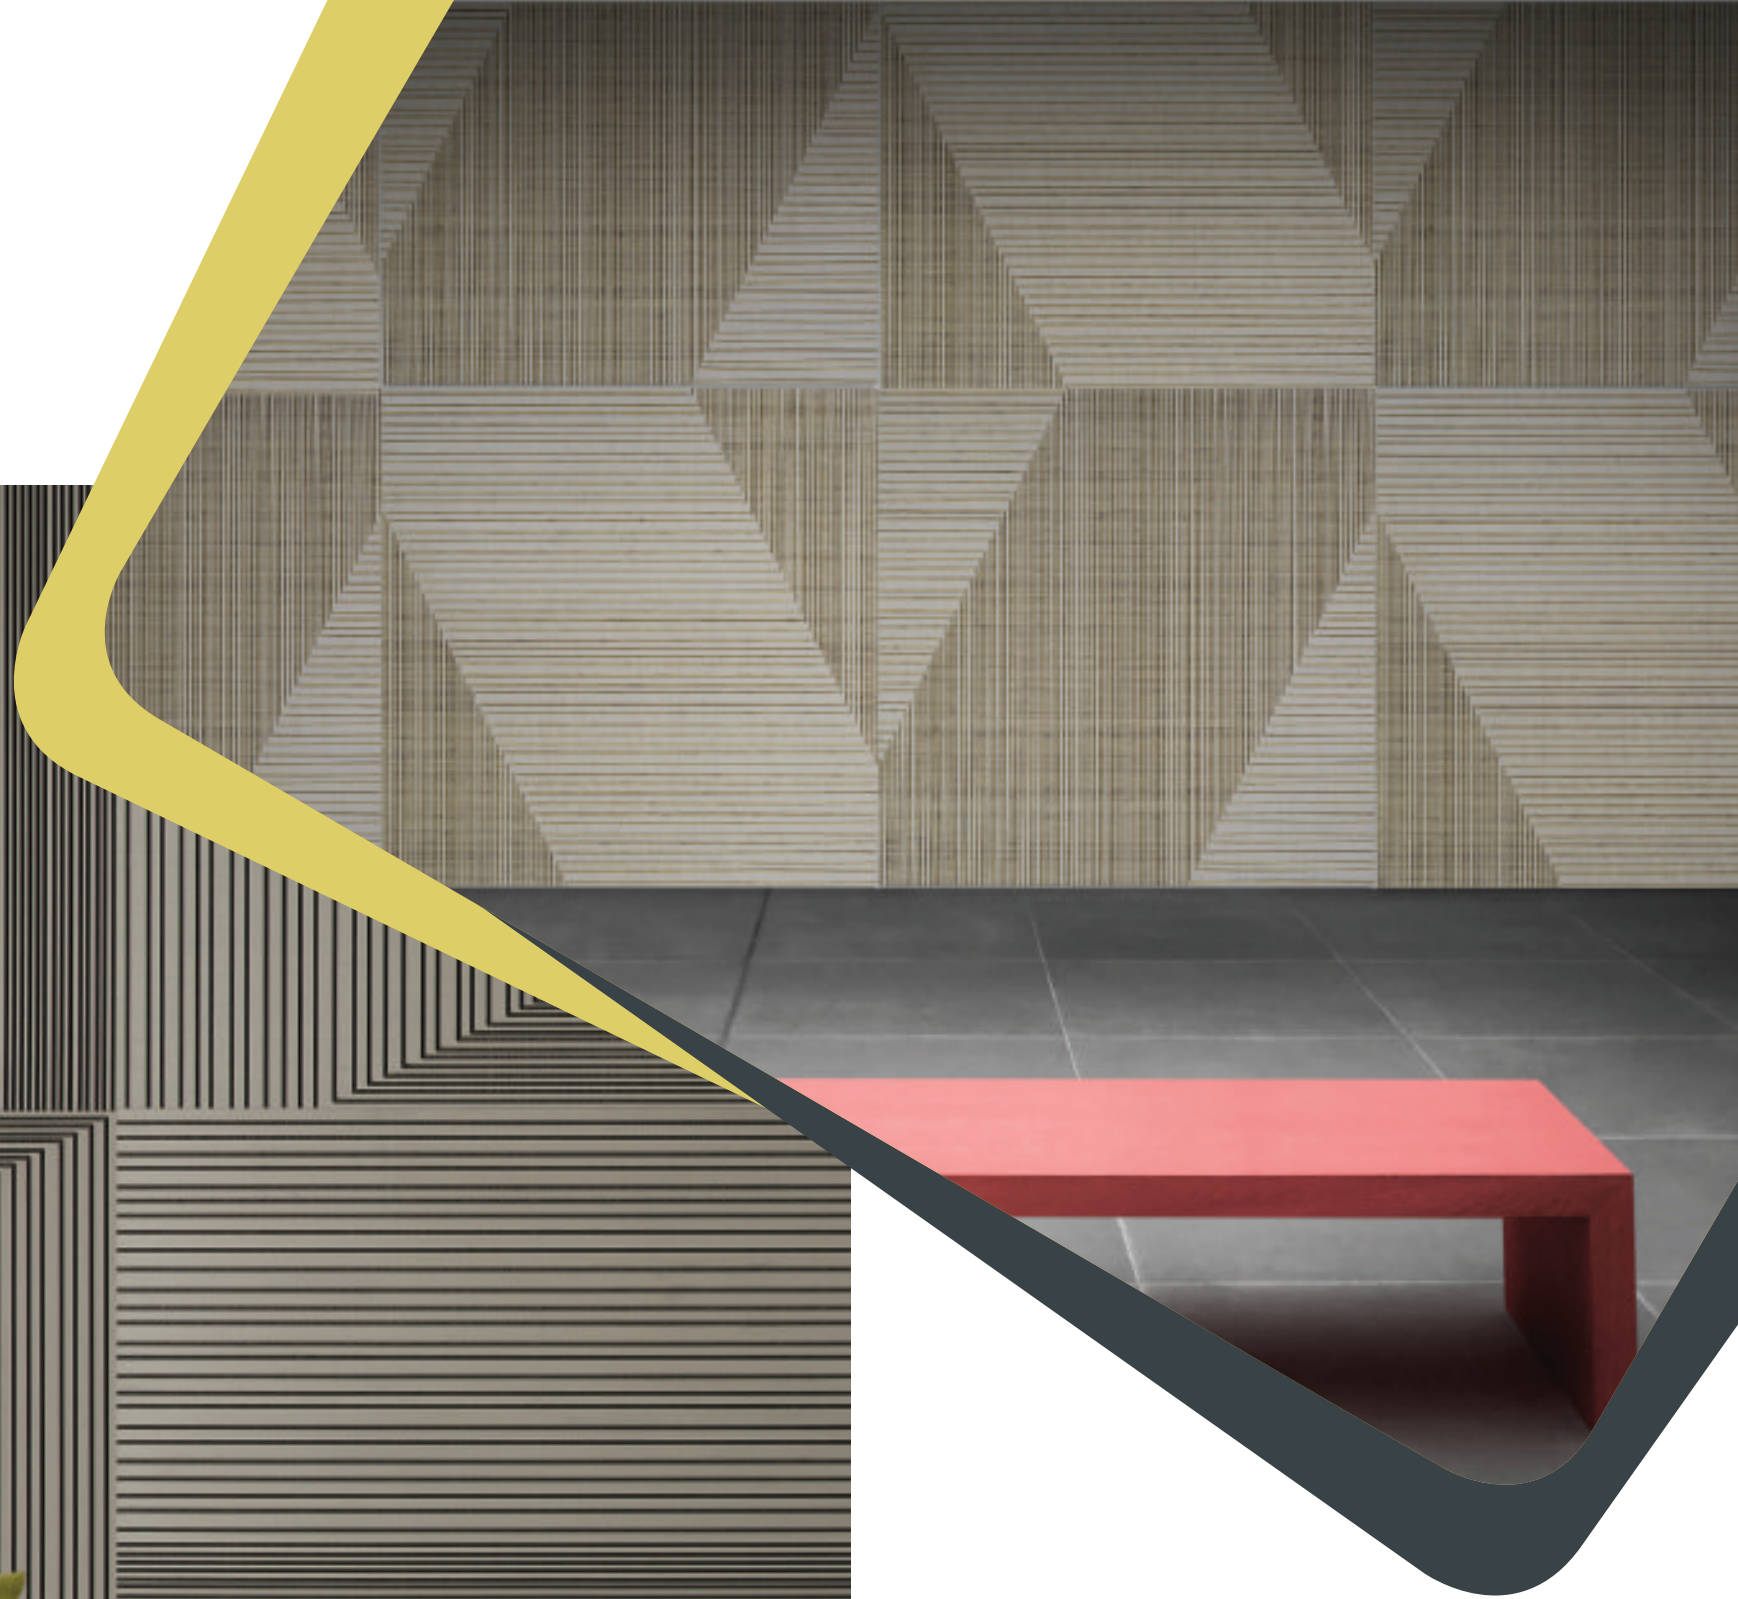

The new Cosmopolitan™ Collection by Plyboo® uses 14 compositional squares to express the degree of an angle in line weight.

By mixing variable primary lines with angles, modern compelling linear and hidden geometries are spontaneously revealed.

The 48 inch squares can be assembled

vertically or horizontally. Gradient lines and cascading angles create depth and dimension to form abstract and compositional geometric designs.

Cosmopolitan's panel styles allow for a wide range of visuals for any project. Available in all standard Plyboo colors with custom options upon request.

Cosmopolitan designs shown here are just a few of the many that are available. Greige Noir (left) and Fog (above) other colors and custom options available. Contact your representative for more information
